PROFESSIONAL SUMMARY

Results-driven Software Engineering undergraduate at SLIIT with hands-on experience building full-stack web applications using the **MERN stack** (MongoDB, Express.js, React, Node.js). Proficient in **RESTful API design**, **JWT authentication**, and **microservices architecture**. Experienced in automated testing with **Playwright (TypeScript)** and **Selenium WebDriver**. Passionate about building innovative, user-centered solutions and contributing technical expertise in a professional internship environment.

TECHNICAL SKILLS

Languages:	Python, JavaScript (ES6+), Java, PHP, C/C++
Web Technologies:	HTML5, CSS3, React.js, Node.js, Express.js, Tailwind CSS, Vite
Databases:	MongoDB, MySQL
Testing Tools:	Playwright, Selenium WebDriver
Tools & Platforms:	Git, GitHub, VS Code, Postman, RStudio, Eclipse, Cisco Packet Tracer
Operating Systems:	Linux, Windows
Methodologies:	Agile/Scrum, RESTful API Design, Microservices Architecture, JWT Authentication

ACADEMIC PROJECTS

CareLink – Healthcare Platform

Group Project | [Node.js](#), [Express](#), [React](#), [MongoDB](#), [JWT](#), [Microservices](#)

- Architected an auth-service with JWT-based authentication, secure login, registration, and role-based access control for **3+ user roles**
- Constructed a patient-service module with full CRUD operations managing sensitive patient records with data-security best practices
- Designed and delivered **10+ RESTful APIs** across a microservices architecture ensuring scalability, separation of concerns, and data integrity

Hospital Management System

Group Project | [React](#), [Vite](#), [Tailwind CSS](#), [Node.js](#), [Express](#), [MongoDB](#), [JWT](#)

- Built a full-stack application overseeing hospital operations — patient records, staff scheduling, and appointments — across **multiple departments**
- Executed a complete appointment management module (CRUD) with full form validation, error handling, and **real-time status updates**
- Integrated **5+ frontend interfaces** with backend APIs for seamless, responsive interaction across all modules

AquaShield – Illegal Fishing Reporting App

Group Project | [Node.js](#), [Express](#), [MongoDB](#), [React](#), [Tailwind CSS](#)

- Assembled a full-stack web application enabling users to report illegal fishing and monitor aquatic species across **multiple regions**
- Created a Species Management admin panel with CRUD operations and data-integrity validation for **20+ aquatic species**
- Implemented a fish species identification feature to aid public users in accurate, real-time species recognition

Online Fitness Store

Individual Project | [MERN Stack](#) ([MongoDB](#), [Express](#), [React](#), [Node.js](#)), [JWT](#), [Vercel](#)

- Launched a fully functional e-commerce platform featuring **50+ fitness products**, JWT auth, product catalogue, search & filtering, shopping cart, and checkout workflow
- Crafted a responsive, mobile-first UI ensuring a seamless experience across **all screen sizes and devices**
- Deployed to Vercel with **continuous delivery**, enabling a live, publicly accessible, zero-downtime production environment

Computer Equipment Online Shop

Individual Project | [MERN Stack \(MongoDB, Express, React, Node.js\)](#), [JWT](#), [Vercel](#)

- Built a complete e-commerce web application with product browsing, cart management, order history, and secure JWT authentication
- Published to Vercel with live, publicly accessible product demos and a **continuous deployment** pipeline

Expenses Tracker

Individual Project | [React](#), [Vite](#), [Tailwind CSS](#), [Node.js](#), [Express](#), [MongoDB](#), [Google OAuth](#), [JWT](#), [Recharts](#), [Render](#)

- Developed a full-stack expense tracking application with Google OAuth 2.0 authentication and JWT-based session management for secure, stateless API communication
- Engineered a custom React hook (useExpenses) encapsulating all CRUD operations, data fetching, filtering, and aggregation logic across expenses and incomes
- Built 6 interactive financial charts (area, line, bar, pie) using Recharts to visualize spending trends, income comparisons, category breakdowns, and cumulative balance
- Designed and deployed a REST API on Render with Express/MongoDB/Mongoose handling user, expense, and income collections across a clean MVC architecture

Automated Testing Suite

[Playwright \(TypeScript\)](#), [Selenium WebDriver](#)

- Automated end-to-end web testing using **Playwright (TypeScript)** covering real-world user scenarios across key application flows
- Conducted cross-browser testing with **Selenium WebDriver** across Chrome, Firefox, and Edge, ensuring broad compatibility

EDUCATION

B.Sc. (Hons) in Software Engineering

[Sri Lanka Institute of Information Technology \(SLIIT\)](#)

- Core modules: OOP, Data Structures & Algorithms, DBMS, Software Engineering, Web & Full-Stack Development
- Holding Higher Diploma in Information Technology from SLIIT

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Higher Diploma in Information Technology — SLIIT

MERN Full Stack Development course — Skyrek Institute

Python Programming – Full Stack Developer Program — University of Moratuwa

Web Design for Beginners — University of Moratuwa

Diploma in English — E-soft Metro College

EXTRACURRICULAR ACTIVITIES

- Karate-Do Practitioner | Sri Lanka Karate-Do Federation (2015 – Present) — affiliated with WKF, AKF, and the National Olympic Committee
- Competed in Ratnapura District Karate Championship (Under-13 Boys Kata)
- Awarded Certificate of Merit – Sabaragamuwa Province Technical Skills Review
